Quiz 3	Calc 3	10/30/24
--------	--------	----------

1. Give parametric equations x(t), y(t), z(t) and bounds for t that produce a gory path from (-2, 3, 1) to (5, 4, 1).

2. Give parametric equations x(t), y(t), z(t) and bounds for t that produce the half with negative x values of circle with radius 5 centered at (0, 0, 2) in the plane z = 2 traversed counterclockwise (when viewed from above). That's the path this creepy ghost is following and I'm really scared!
